SELF HEALING EXTERIOR CLADDING

Alstone and VMZINC. Two Giants coming together in pursuit of a better world.

Alstone is the most trusted and renowned brand in the Indian market for its Fire Rated Composite Panel, Metal based HPL, Louvers and Honeycomb panels. The giant has been in the industry for around two decades which makes its strong hold in the market, having 500+ channel partners and Pan India presence with its own offices in over 16 states.

VMZINC is the global leader in Zinc Titanium that provides solutions for roofing, facades, rainwater systems, accessories, and ornaments for building envelopes, claddings, and façade rejuvenation. It has been there in the market for over 180 years with a global presence in more than 18 countries.

ECO
FRIENDLY

ZINC - THE GREEN METAL

WITH A NATURAL HEALING TOUCH

Ever seen the gleaming classic roofs of a Parisian cityscape?

Zinc, which has long been used to put back steel, is becoming increasingly important in the green transition.

A bird's eye view of the Paris skyline gleams with zinc's natural sheen.

Zinc was the material of choice for Parisian rooftops in the late 1800s. Not surprisingly, some of the original roofs still crown the historic buildings two centuries later.

And if that seems amazing, let's take a closer look at the commodity and highlight its potential for renewable energy.

Zinc's remarkable longevity can be attributed to its ability to heal itself.

Zinc hydroxyl- carbonate layer forms naturally to prevent moisture and chemicals from penetrating the zinc beneath; if scratched, the hydroxyl- carbonate will reform over time.

ALSTONE: IN SYNC WITH VMZINC

Zinc is widely used in building envelopes, claddings, and facade rejuvenation, As the industry leader worldwide in Zinc, VMZINC offers cutting-edge zinc solutions for roofing, facades, rainwater systems, accessories, and ornaments.

Alstone is partnering with VMZINC strategically in India - to create the materials and milestones for a new India – where builders, architects, facade consultants and other stakeholders are conscious of the impact of their creations on Mother Earth.

ALSTONE®

Quartz AZ 1201

Quartz Zinc has a similar appearance to the natural patina developed by Natural Zinc over time.

It has been treated to look like a naturally aged patina. Quartz Zinc is pre-weathered and when new, offers a colour which is not just, splendidous but also naturally beautiful to look at.

ALSTONE[®]

Pigmento Orange AZ 1204

Pigmento Orange is one-of-a-kind formulation that combines superior rust-inhibiting properties of zinc with a tough but flexible enamel coating and an unusual deep rich orange-coloured satin finish.

The shade represents playfulness, vitality and friendliness with a rich depth. The grain of this pre-weathered zinc is visible through the colour, much like the grain of the wood is visible through varnish coatings. Take advantage and let Pigmento Orange heighten the effect of the structure.

ALSTONE®

Anthra AZ 1207

Anthra Zinc is the first black zinc that has been pre-weathered. It has a distinctive VMZINC stone-like finish that can be blended with a variety of materials, including black slate.

This pre-weathering procedure includes a Natural Zinc surface treatment. Anthra Zinc is not painted, colour variations between batches achieve the desired appearance of stone rather than metal.

ALSTONE®

Pigmento Grey AZ 1208

Pigmento Grey is a deep shade of brushed zinc material that is not only versatile but can also add a more traditional or ultra-modern look to anything. This neutral and subtle colour option is ideal for making accent colours stand out. Furthermore, it retains its value over time because grey metal panels fade less than other colours.
