## Alstone launches 'Louvers' – new premium exterior and interior cladding solutions

**A Personal Touch Of Elegance & Finesse, Its  
Versatile Multi-Application Possibilities Are Truly  
'Limitless'**

Easy installation, maintenance free, super strong, many colour options, fire redundant, termite and rust proof. A high-tech concept for homes or office surfaces that's going to change the way buildings look.

Louvers are considered for easier installation offering 100% maintenance free application. It further enhances the beauty and life of your homes or offices. It comes in a range of attractive colours and textures, minimizing the need for expensive paints or other anti-corrosion measures. It's a one-stop-solution for those looking for sophistication and elegance.

There are manifold applications of Louvers with respect to utilisation such as exterior cladding. Cladding is a dual-purpose external finishing method that resembles a covering or an extra non-load bearing layer. It not only protects the building's interiors from the elements, but it also adds a beautiful and appealing exterior to the structure, and the same goes with interior cladding.

Louvers allow architects new inventiveness like balcony cladding, which inspires amalgamation with urban and airflow design. Louvers can enhance the whole place without any other material and serves with a minimalist design. As mentioned, the whole place includes roof cladding because louvers has the advantage of building the structure entirely.

Louvers furnishes the entire house ornamental, therefore it provides the service of canopy design as well. Fence and railing are also included when it comes to building the entire furnish structure. Louvers propounds such vivid pictures to construct an ideal place.

### **Alstone Louvers offered in wide range of colours and hues**

Louvers provide various propounds

in terms of hues and selection for different sections.

Exterior cladding requires a particular colour, therefore Louvers provide colours such as Armani Grey and Wenge. Armani Grey considers panelling with hints of slate for an awe-inspiring look. On the contrary, Wenge colour provides taupe shade to create a sleek, urbane look.

Louvers provide the notion of different colours for interior cladding

“

”

such as Royal Teak, which is an amalgamation of rich, and subtle shades of almond and radiates warmth.

Novacentopine colour provides a charisma of rustic shade. Black Silver comes with blades of raven black and muted silver and gives you a classic glance. Coffee Silver, Coffee bars with a touch of silver that work together to create a sophisticated look.

Louvers come up with Shadow Grey for fence and railings. Shadow Grey embraces the contrast with charcoal for a glossy, refined aesthetic. Louvers present another hue for Roof Cladding, Dark Teak offers chocolate brown mesh with shades of mahogany.

Louvers give another hue for a wall panel that is Oxford Cherry, which is a vibrant cherry red with a mahogany texture for walls that stand out.

### About the company

Alstone is a leading producer of High Pressure Laminate (HPL) & Fire Rated Composite Panel in India.
