New Delhi, June 9, 2022: ALSTONE, a leading manufacturer of High-Pressure Laminate (HPL) & Fire Rated Composite Panel in India, launches a futuristic, revolutionary Alstone Alcomb. Alstone Alcomb is unique because of its core properties as well as applications which makes it one-of-its-kind in its category. The promising product has features like Fire protection – A2 grade, High strength and excellent rigidity, lightweight, impact & sound resistance, and 100% recyclable. Right from building facades, ceilings/ flooring panels and furniture to commercial/military vehicles and doors and floors of railways – Alstone Alcomb can be used in a wide range of applications. The entire range can be seen at www.alstoneindia.com.

ALCOMB is a robust yet lightweight panel that's composed of two Aluminium alloy sheets facing each other and an inner honeycomb core that's made from Aluminium foils – a true inspiration of the natural hexagonal honeycomb. Experience the difference with the unique honeycomb structure that makes the product lighter than other materials and also improves the rigidity and stability of its body. Besides, these panels are eco-friendly and are completely recyclable and reusable.
